ASPHALT PERFORMS

For today, tomorrow, and the future, asphalt pavements perform when it comes to value, sustainability, innovation, and flexibility.

**TODAY**

- **INNOVATION**
  - More than $30M has been invested in product research by the asphalt industry since 1986.

**FUTURE**

- **INNOVATION**
  - Visionary engineers are developing asphalt mixes to meet the needs of future cities.
  - Enabling the 8M autonomous vehicles expected to be on the road by 2025 to “see” asphalt roadways.

**FLEXIBILITY**

- **TOMORROW**
  - 2,200+ students have been awarded industry scholarships, totaling more than $5.1M.
  - 3x faster how quickly asphalt roads can be built and repaired, compared to other pavement materials, saving drivers time in traffic.

- **TOMORROW**
  - All 50 the number of states where you can find the aggregates that make up 95% of asphalt pavement.

- **FLEXIBILITY**
  - 7B gallons the average amount of fuel Americans save annually by driving on smoother roads — the equivalent of taking more than 10 million vehicles off the road every year.
